

FLEXO MACHINE - MODEL TELIA 8 FSC - AT A VERY SPECIAL PRICE

During the month of October, at the AMUT Open House Hall in Novara, the brand new flexo gearless machine, TELIA 8 FSC model, will be in demo show and available for personalized tests on demand.

TELIA 8 FSC includes the following main features:

- printing width: 1.300 mm (51")
- print repeat range: 340 (13.8") - 900 (36") mm
- fully automatic unwinder and rewinder for 800 (31,5") mm diameter rolls
- web inspection system complete of automatic register control

TELIA FSC is mainly designed for customers wanting to invest in a new flexo gearless press for short runs and reduced job change downtimes.

TELIA FSC incorporates all the last developments of the TELIA programme:

- **unique and patented FSC system:** allowing less than 7 meters of web scrap when making a complete job change.

- **FSC Kiss Contact system:** revolutionary automatic pre-set system of printing pressures with machine in fully idle mode.

- **FSC Dry-Fast System:** the new triple-zone drying system granting perfect drying in any conditions, even within constraints of reduced footprint/ceiling spaces.

- **Biellowash 4.0 System:** the updated fully automatic inking, washing, viscosity and ink flow management system.
