

## **A NEW DIE CONCEPT ON AMUT DOLCI BIELLONI MULTILAYER BLOWN FILM LINES**

On all our 5-7-9 layers lines, either for technical films or for barrier films, we include:

### **THE PANCAKE STACKABLE DIE**

The advantages are:

- Shorter melt passages
- Lower resident time
- Faster heat up time
- Possibility of using a wider range of resin
- Independent temperature control of each layer
- Reduced time in resin changes
- Saving of over 60% in energy consumption
- Die height and weight reduced by 50% compared to center fed dies
- Possibility of splitting the same layer for improved mechanical properties

**AND THE RESULT IS.....A SUPERIOR QUALITY OF FILMS AT HIGHER OUPUT**
