

## THE AMUT DOLCI BIELLONI PERMANENT “SHOW ROOM”

We wish to inform all our existing and potential Customers that our Company has decided to invest in a **Permanent Show Room** in a dedicated area closed to our factory.

In the meantime, we have finalized a **technical cooperation agreement with DOW Chemical**. This cooperation agreement involves the development of new resins and improvements on the lines to achieve higher performances and lower energy costs.

In the Show Room we will have permanently available:

- one 3-Layer 1 meter line producing stretch film,
- one 7-Layer 2 meter line producing stretch film, with new high speed winders and new “PROGRESSIVE” cooling system for superpower stretch,
- one Gearless Flexo press.

We decided this important investment in order to put the lines at full disposal of our Customers to **run specific trials and to test new products and film structures**.

You are invited to come and take advantage of our initiative. We are ready to run specific demos for You.

This is the first step of our development program that we have announced when starting the new AMUT DOLCI BIELLONI Company.
